General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed does not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed inside the back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

PUBLIC NOTICE AND STATEMENT OF BASIS

Notice is hereby given that the New Jersey Department of Environmental Protection (Department), Site Remediation Program, proposes to restrict and control the discharge of water from the United Water Toms River Parkway Wells Numbers 26, 28 and Interceptor Well #26B. The water from these wells are treated by an air stripper and pumped via a 12 inch main to two sets of Granulated Activated Carbon (GAC) Contactors which can be operated in parallel or series mode. The treated water from the GAC Treatment System is conveyed to the Garden State Parkway (GSP) storm sewer headwall structure via approximately 2,200 feet of 12-inch diameter ductile iron pipe. The treated water is piped into a pipeline under the Garden State Parkway on the East Side and discharges to the ground once it exits the pipeline on the West Side of the Parkway. The system design flow is 1,400 gallons per minute. In addition to this continuous flow, a small amount of ground water associated with periodic monitoring related to the Reich Farm plume will be treated and discharged under this permit.

This notice is being given to inform the public that the Department has prepared a draft NEW JERSEY POLLUTANT DISCHARGE ELIMINATION SYSTEM / DISCHARGE TO GROUND WATER (NJPDES/DGW) permit NJPDES NO. NJ7002114 in accordance with the provisions of the New Jersey "Water Pollution Control Act" (N.J.S.A. 58:10A-1 et seq.), its implementing regulations (N.J.A.C. 7:14A-1 et seq.), and the Ground Water Quality Standards (N.J.A.C. 7:9-6 et seq.).

The implementation of the New Jersey Pollutant Discharge Elimination System requirements are the enforcement mechanism by which pollutant discharges are brought into conformance and compliance with laws, regulations and standards. The pollution control requirements are those conditions necessary to restrict the discharge of pollutants and protect the public health and the environment. This particular discharge has no exceedances above standards mandated by the Safe Drinking Water Act, the Ground Water Quality Standards or any Federal Maximum Contaminant Levels. This discharge is being performed as a precautionary measure, since the toxicity of the group of substances found, referred to as "SAN trimer", is unknown. It should be noted that the "SAN trimer" has not been detected in the discharge.

The draft document prepared by the Department is based on the administrative record which is on file at the offices of the Department, Site Remediation Program, located at 401 East State Street in the City of Trenton, Mercer County, New Jersey. It is available for inspection, by appointment, between 8:30 A.M. and 4:00 P.M., Monday through Friday. Information regarding appointments for inspection may be scheduled by calling Richard Yarsinsky at (609)-633-0763.

Interested persons may submit written comments on the draft permit to the Assistant Director, Responsible Party Cleanup Element, PO Box 028, 401 East State Street, Trenton, New Jersey, 08625. All comments shall be submitted within 30 days of the date of this public notice. All persons, including the owner or operator, who believe that any condition set forth in this document is inappropriate, must raise all reasonably ascertainable issues and submit in writing to the Department all reasonably available arguments and factual grounds supporting their position, including all supporting material, by the close of the public comment period. All comments submitted by interested persons in response to this notice, within the public comment period, will be considered by the Department with respect to the requirements being applied to this facility. After the close of the public comment period, the Department will make a final decision. The Department will respond to all significant and timely comments when a final decision is made. The owner or operator and each person who has submitted written comments will receive notice of Department's final decision.

Any interested person may request in writing that the Department hold a nonadversarial public hearing on the draft document. This request shall state the nature of the issues to be raised in the proposed hearing and shall be submitted within 30 days of the date of this public notice to the Assistant Director, Responsible Party Cleanup Element, at the address cited above. A public hearing will be conducted whenever the Department determines that there is a significant degree of public interest in the permit decision. If a public hearing is held, the public comment period in this notice shall automatically be extended to the close of the public hearing.

Additional information concerning the draft NJPDES Permit may be obtained between the hours of 8 A.M. and 4 P.M., Monday through Friday from Bob Marcolina of the Bureau of Case Management at 609-633-7237.

WATER SUPPLY ADMINISTRATION

Notice of Public Forum
Management of Water Supplies During Drought

Take notice that the Department of Environmental Protection (Department) and the NJ Water Supply Advisory Council (WSAC) will hold a public forum on the management of the state's water supplies during drought. The drought of 1999 was one of the most severe that New Jersey has ever experienced. With possible long-term changes in weather patterns, more severe drought is a possibility in the future. Planning for these future events will be a challenge.

The Department and the WSAC will hold a public forum to hear from the public and other affected by last years' drought on how these events can be better managed.

Specifically, the Department and the WSAC are seeking comments from the public on: 1) how they would like the Department to manage future droughts; 2) which entities should be involved in managing droughts (purveyors, municipalities, etc.); 3) should cutbacks be required during drought; 4) how much water should be cut back during a drought; 5) is there a real perception that there are unlimited amounts of water; 6) how were they affected by water restrictions during the last drought; 7) are they aware of the issues when drought management decisions are made; 8) who should get water and who should not; 9) how much is the public willing to pay for an unlimited supply of water; and 10) should there be differential rates during the summer and during drought periods?

The Department and the WSAC will hold a half-day public forum on drought management in New Jersey on April 25 from 9:00 to 12:00. Written and oral comments will be accepted during that time. The forum will be held at the following location at the below date:

New Jersey Department of Environmental Protection
401 East State Street
Trenton, New Jersey 08625
April 11, 2000
9:00 AM to 12:00 PM

Pre-registration is requested in order to receive parking permits. To pre-register or for further information on this forum, please contact Robert Kecskes of the Department's Division of Watershed Management at (609) 777-1053 or rkecskes@dep.state.nj.us or Professor Eugene Golub of the New Jersey Institute of Technology at (732) 431-4494 or golub@adm.njit.edu. Written comments or testimony may also be submitted to Robert Kecskes at the above address. All written comments and testimony must be submitted by May 12.

<i>Facility name / NJPDES Permit No ./ SRP Case ID</i>	<i>Facility location / address / County</i>	<i>NJDEP case manager / Bureau / phone number</i>	<i>Permit Type / Formation / Ground Water Classification</i>	<i>Executive Summary</i>
Joyce Kilmer Service Area (8N) 7000987 90-11-09-1610	NJTP - Milepost 78.7 North East Brunswick Middlesex County	David Nickerson BUST (609) 633-1445	Discharge to Ground Water Pennsauken Formation II-A	The New Jersey Department of Environmental Protection (Department) is issuing a draft renewal of a permit to restrict and control the discharge of pollutants from Joyce Kilmer Service Area. The discharge is to the Pennsauken Formation, where ground water occurs under water-table conditions. Depth to ground water is approximately 18 feet to 26 feet below grade, and flows in a south-southwest direction. The operating remediation system will actively remove dissolved ground water contamination. Existing recovery wells RW-1 through RW-3 are pumped to lower the water table, thus directing the flow of dissolved ground water contamination to three recovery points. The contaminated ground water withdrawn from recovery wells RW-1 through RW-3 are pumped through a carbon treatment system before being injected back to the ground water using five injection wells upgradient of the dissolved plume. The permit will allow the permittee to discharge treated ground water upgradient of the dissolved plume into five injection wells on-site, and to continue active ground water remediation of the dissolved plume. The permittee is required to currently maintain hydraulic control of the dissolved ground water contaminant plume, which resulted from leaking underground storage tanks.
US Oil Corporation - High Mountain Automotive 8000018 0065108	1052 High Mountain Road North Haledon Passaic County	Karen Mersereau BUST (609) 292-5184	Discharge to Ground Water Basalt II-A	The facility is an active gasoline station which has an approved on-site ground water recovery system that extracts contaminated ground water. The water is treated and was formerly discharged to the sanitary sewer under a Remedial Action Workplan Approval (RAW) dated April 6, 1998. The contaminants present are: benzene, toluene, ethylbenzene, xylenes, methyl tertiary butyl ether (MTBE) and tertiary butyl alcohol (TBA). On December 31, 1999, a 90-day NJPDES/DGW permit-by-rule commenced which allowed injection of the treated water into the ground water via an upgradient infiltration gallery, as a pilot study. The NJPDES/DGW permit will allow the treated water to be discharged into the ground water of the Orange Mountain Basalt Formation, via the upgradient infiltration gallery, beyond the permit-by-rule period. Ground water sampling is/will be conducted quarterly, in accordance with the RAW Approval.
